Tom,

Attached is my attempt to clean up our streamline ESA edits of the MOA. We initially had minimal and optimal language but as a team determined the minimal language was sufficient and the draft I've given you shows the additional "optimal" language deleted as well. I've removed all comment bubbles, all ESA is highlighted in yellow with suggested deletions shown. There is also a section highlighted in blue, this we recommend retaining but it is not ESA specific so we recommend it is moved to a different section of the MOA. Note that we are still reviewing the document and there are potentially other edits/comments we plan to communicate to FDEP beyond the ESA specific edits here.
